Our regulatory framework

Article 7.3 Dutch Higher Education Act (WHW)

- 1. An institution offers education in the form of educational programmes.**
- 2. An educational programme is a coherent entity of components, aimed at the realisation of well-described objectives relating to knowledge, insight and skills that that person who completes the programme, shall have obtained. A component can relate to the practical preparation to exercise the profession and to the exercise of the progression in relation to education in a dual-programme, in so far as these activities are made under supervision of the board of directors of the institution.**
- 3. Every programme has an final-assessment. Every component as an exam.**
