

EDELNet GRADUATE SCHOOL

The programme of the EDELNet Graduate School consists of a number of courses and activities that essentially aim to equip our Junior Fellows with the key research competences and skills necessary to both complete their dissertations and have successful international academic careers. Accordingly, together with a number of high quality online courses, seminars and guest lectures, we offer a series of international face-to-face activities, international networking, bi-national supervision, and support for research stints at any of our partner universities.
